Project Spotlight

Spontaneous visit to alma mater

Ken Bachman recently dropped in at State College High School to converse with students in the Building Construction Program of CTC (Career & Technical Center). The instructor, Chris Warren, teaches using a "hands on" project-oriented approach with the construction of a sustainable Eco-cabin. The last phase of this project is nearly complete and ready for a "road show". The emphasis of this program is not only the fundamentals of construction and Green Building, but preparation for career development as well.

Web page update

The Bachman Homes website recently experienced an upgrade. A "Green Building" page has been added, and the portfolio page was modified to display more pictures of our projects. In addition, our newsletters from past editions are now available to you as a resource on a new page. Check it out at www.bachmanhomes.com

The Excitement Is Building!

Giving Back to the Community

Earlier this week two members from our team, Marvin Sanders and Bob Lynn, spent a day framing at the site for the new Wesleyan Church in Beech Creek, PA. The construction of this 9,000 square foot building is sponsored by the Carlisle Brethren in Christ Church. Over 100 volunteers are on site daily during this week-long effort. Thank you Marvin and Bob!

"Health is not valued till sickness comes."

-Dr. Thomas Fuller
