Slippery tub and tile surfaces

Slippery tubs and tiles can be treated with a product we discovered called "Johnny Grip". This product is easy to apply, does not discolor the surface, and can be used on multiple surfaces including porcelain, ceramic and travertine. Additional details can be found at www.slipperytile.com

The Excitement Is Building!

Decisions, decisions... what should I choose first?

We are frequently asked how one should prioritize interior finishing details. When appointing a new home it is imperative that styles and flow throughout the home. Cabinets typically are selected first, followed by plumbing fixtures, lights, countertops, floor coverings and finally wall colors. The challenge is to remain consistent! It is easy to suddenly discover a wall color, for example, that you adore but does not complement the kitchen cabinets you already selected. Early on you must decide which item has the priority and base all subsequent decisions on, say, the cabinets or the floor tile. Find your "button", and stick to it! In the end, you'll have a beautiful product.

"An optimist stays up to see the New Year in. A pessimist waits to make sure the old one leaves." - Bill Vaughan
