Project Spotlight

Gladiator GarageWorks cabinets and accessories

Gladiator GarageWorks products are designed to get your workshop or garage organized once and for all! These modular units allow you to easily re-arrange cabinets and components as your needs change. Constructed from heavy-duty materials, the cabinets have the strength of steel and feature a tread plate design, durable powder coat finish, and oversized casters. Bachman Homes can quickly and inexpensively install your custom cabinets and wall slot systems.

The Excitement Is Building!

Bachman Homes is Green Certified

We are pleased to announce that both Ken and Randy Bachman have completed the professional coursework and training required for the NAHB Green Certified designation. Perhaps the most gratifying part of this achievement is realizing that many of our core standards are, in fact, green standards. We have built green for all these years and didn't even know it. We are excited to offer Green certification for all of our custom projects moving forward. In fact, one of our current projects will achieve green certification and be showcased in the 2010 Parade of Homes.

Maintenance Corner

Spring Maintenance – from Heat to Air Conditioning

It is time to transition your furnace to summer mode! In sum, we want to reduce humidity in the home and prepare for summer cooling. The process is very simple: 1) Turn off humidistat. Clean filter, empty and clean tray (if applicable) and close water valve (if accessible). 2) Set the damper from furnace to humidifier in the closed position, preventing cool air from passing through the humidifier. This is very important. Your damper setting may be marked with "Summer" or "Closed – Cooling". 3) Continue to clean the furnace filters on a monthly basis.

"Ability is what you're capable of doing. Motivation determines what you do. Attitude determines how well you do it." - Lou Holtz
